

Dripfit[®]

Pipe & Fitting

Save Water, Save a Life, Save Earth

Mfg. of SWR, AGRI PIPE & FITTINGS

About Us :

Dripfit is a leading manufacturer specializing in SWR, Agriculture pipes and Fittings. We have been dedicated to providing high-quality, durable, and reliable products for various applications in the construction and agricultural sectors. Our commitment to innovation, quality, and customer satisfaction has positioned us as a trusted partner for businesses and projects around the world.

SWR Pipes & Fittings

SWR (Soil, Waste, and Rainwater) pipes and fittings are essential components used in the plumbing and drainage systems of residential, commercial, and industrial buildings. These products are designed to manage and direct soil, waste, and rainwater effectively, ensuring proper drainage and preventing issues related to blockages and water damage.

Agriculture Pipes & Fittings

Agriculture pipes and fittings are specialized components designed for irrigation systems and other agricultural applications. They play a crucial role in efficient water distribution, ensuring that crops receive the necessary water for proper growth. These products are designed to withstand the demands of agricultural environments, including exposure to varying weather conditions, soil, and chemicals.

Sustainability

We are committed to environmental sustainability and incorporate eco-friendly practices in our manufacturing processes. Our products are designed with sustainability in mind, contributing to efficient resource use and reduced environmental impact.

Customer Focus

Customer satisfaction is central to our business philosophy. We strive to understand and meet the unique needs of our clients through personalized service and support. Our experienced team is dedicated to providing timely solutions and building long-lasting relationships with our customers.

Save Water, Save a Life, Save Earth

SWR PIPE FITTINGS

It is a SWR Ring Fit drainage Fitting for soil, waste and rain water, it is a unique system that is joined together by simply pushing the spigot into socket end. The spigot end is held strongly in the socket by the co-molded yellow rubber ring provided in the groove. This co-molded ring ensures leak proof joints that can withstand high pressure, prevent chocking and allow thermal expansion and contraction. This system thus does not require to paste or to thread.

AGRICULTURE PIPE FITTINGS

Agriculture Fitting offers wide range of pipe & fittings used for Agriculture and water distribution system. Complete range of 20mm to 160mm with various pressure rating.
